Application No.

Continuation of 2. NOTE: Said amendment is non-compliant with respect to 37 CFR 1.121 in that the text of cancelled claims should not be written out. Additionally, new claim 18 raises the question of new matter with respect to the "space between yarn strands."

Continuation of 5. does NOT place the application in condition for allowance because: Applicant's argument with respect to the 112, 2n rejection is unpersuasive. Specifically, it is is unclear how a single fiber can be comprised of a plurality of fibers (i.e., some synthetic fiber and some other fiber). If applicant intends the claim term "fiber" to encompass "yarn" as is suggested in applicant's Remarks, then the claims should be amended accordingly.

Applicant's arguments with respect to the order of the coating steps have been noted. Said argument would likely overcome the anticipation rejection, but an obviousnessness rejection would have to be considered.

Upon entry, applicant's amendment to claim 17 would be sufficient to overcome the 112, 1st rejection of said claim.
